Billing, Operations Support, & Back-Office Solutions

PROFITEC®

Profitec provides more billing and OSS solutions to the resale industry than any other company.

Profitec provides sophisticated billing services to local telephone companies, long distance carriers, cable providers, utilities, ISP's, wireless providers and many others. In addition to our staple services - service bureau processing, in-house customer service, and database administration - we also offer network provisioning, credit & collections, inbound sales & order entry, and telemarketing. We can also pull from this broad base of services to design a custom turnkey solution to meet your needs.

OmniSuite is an integrated set of applications which combine a powerful billing system and a host of support applications.
